The Permittee indicated that the current accumulated sediment elevation (5,501') in the East Pond is above the 60% sediment capacity (5,497.3') and that their intention is to clean the sediment from the pond "when weather conditions permit". The assigned Division inspector will verify the accumulated sediment level during the next inspection and/or that the sediment ponds have been cleaned. The accumulated sediment elevation in the West pond was reported as being more than 2' lower than the 60% clean-out elevation (5,501.3 vs. 5,503.4').
