**1. Permits, Change, Transfer, Renewal, Sale**

The permittee has submitted a response to the Division for the mid-term review. The Division is reviewing the mid-term response.

**2. Signs and Markers**

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

**3. Topsoil**

The topsoil piles appear to be stable and protected by a berm. There has been some erosion from water/rain but the material is saved by the berm around the pile. See Photo

**4.a Hydrologic Balance: Diversions**

I inspected diversions and culverts throughout the property. They were open and would function as designed during a storm event. The structures were recently re-graded and clean out of sediment. See photos

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

**8. Noncoal Waste**

The property was clear of non-coal waste materials such as oil, trash and grease cans.

**16.a Roads: Construction, Maintenance, Surfacing**

The roads were compacted with no dust control problem. The roads were wet and had been recently watered.

**16.b Roads: Drainage Controls**

I inspected the road diversions and culverts throughout the property. They were functioning as designed. See Photos

**18. Support Facilities, Utility Installations**

No new facilities constructed since the last inspection.
