### Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

I went to inspect the loadout on June 5th and conducted a partial inspection on June 14th. The complete inspection was missed for the second quarter of 2018. The reason is no personnel have been present to inspect the books. The gates are locked with no cars in the parking lot. Management advised me to do a partial inspection. A cessation Order is still outstanding for moving refuse material off site. The abatement is to recover all material and bring it back to Wellington Dry Coal. The abatement was extended until July 30th, 2018 by the Director.

**1. Permits, Change, Transfer, Renewal, Sale**

There are no permitting actions with the Division at this time.

**2. Signs and Markers**

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

**3. Topsoil**

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm.

**4.a Hydrologic Balance: Diversions**

Majority of the diversions cannot be seen from outside the fence line. Most likely they need some maintenance due to sediment build-up, but, are functioning.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

Sediment ponds are incised. They appear to have stable embankments. No water was discharging during the inspection. These ponds do not discharge normally.

**8. Noncoal Waste**

The property was clear of non-coal waste materials such as oil, trash and grease cans.

**15. Cessation of Operations**

The operation is inactive. The permittee can operate this facility at this time.
