1. Permits, Change, Transfer, Renewal, Sale

The permittee has not submitted contact information to update Chapter 1. A Notice of Violation was written last month. I have issued a FTACO #21210 for failure to abate.

The Division management and lawyers are going to have a meeting to address the lack of response by Wellington Dry Coal.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

4.a Hydrologic Balance: Diversions

Diversions have sediment within and a culvert is 80% plugged. A "Notice of Violation" was written last month. The abatement time has lapsed with no abatement. I issued a FTACO #21212.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds contain small amount of water but were not discharging. I did not see any hazardous conditions. The inlets were functioning as designed. The embankments were stable. No quarterly sediment pond inspections have been given to the inspector since March 2018.

8. Noncoal Waste

There is some trash and a blue plastic container in a ditch.

16.a Roads: Construction, Maintenance, Surfacing

Roads were in good shape. I did not notice any dust problems.

16.b Roads: Drainage Controls

Road diversions and culverts need maintenance.
