1. Permits, Change, Transfer, Renewal, Sale

There are no permitting actions with the Division at this time. The permittee has not responded to Division letters or violations. A person could make a determination that this site is abandoned.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

4.a Hydrologic Balance: Diversions

I inspected diversions and culverts throughout the property. Several diversions have sediment which would not meet the approved designs. One culvert is plugged with sediment, and others are blocked with weeds. A Failure to abate cessation order was written and has reached its 30 days time limit. No other action is expected to be taken by the inspector.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds contain a small amount of water from the night before rainstorm. No hazardous conditions were noticed. I have not seen a quarterly sediment pond inspection since March of 2018.

8. Noncoal Waste

There is a small amount of trash now on site. There is a large blue plastic container, and garbage.

16.a Roads: Construction, Maintenance, Surfacing

Roads were wet and muddy.

16.b Roads: Drainage Controls

No water was on the road. Diversions are not meeting performance standards.
