1. Permits, Change, Transfer, Renewal, Sale

The Division is waiting on the Board of Oil, Gas and Mining decision to go for bond forfeiture.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. Most likely the information is not correct, since no one answer the phone. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm.

4.a Hydrologic Balance: Diversions

Diversions and culverts have sediment within. A Notice of violation was written in 2018 with no action taken by the permittee.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I did not see any hazardous conditions. The embankments appear to be stable. The ponds were not discharging during the inspection. Most likely the sediment ponds were dry. I could not see the bottom of the ponds from standing outside the fence line.

8. Noncoal Waste

There is some non-coal waste material throughout the property.

10. Slides and Other Damage

No slides or other damage was notice during the inspection.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem.

16.b Roads: Drainage Controls

Road diversions and culverts contain sediment and are not functioning as design.
