2. Signs and Markers

The identification sign is meaningless since the Division and other State agencies have tried to contact this permittee using this address without success in sending any correspondence. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

4.a Hydrologic Balance: Diversions

Most diversions are filled with sediment. Violations have been written with no results in repairing and cleaning out of sediment within the diversions.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. The ponds contained were dry. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as design. I did not see any hazardous conditions to these structures.

7. Coal Mine Waste, Refuse Piles, Impoundments

There are several piles of refuse material throughout the property. See Photos

8. Noncoal Waste

The site does have some non-coal waste materials such as trash, oil cans, wood and scrap materials.

10. Slides and Other Damage

The mine site appears to be stable

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem.

16.b Roads: Drainage Controls

Diversions contain sediment and violations have been written.
