## **2. Signs and Markers**

I inspected the identification sign and it meets the requirements of the R645 Coal Rules. No one is at the address and letters have been return to the Division.

## **3. Topsoil**

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

### **4.a Hydrologic Balance: Diversions**

Diversions and culverts are filled with sediment. They will most likely function during a small storm everts.

### **4.b Hydrologic Balance: Sediment Ponds and Impoundments**

I did not see any hazardous conditions. The embankments appear to be stable. The sediment ponds were dry and therefore not discharging water. The inlets to the ponds had weeds and brush hindering the water to flow to the pond.

## **7. Coal Mine Waste, Refuse Piles, Impoundments**

There are approximately 12 piles of material/refuse that will need to be removed or cover up. The piles are stable.

## **8. Noncoal Waste**

There is some non-coal waste material such as wood, paper and plastic cans lying around the property.

## **10. Slides and Other Damage**

No slides or other damge was notice during the inspection.

### **16.a Roads: Construction, Maintenance, Surfacing**

Roads were well compacted with no dust problem.

### **16.b Roads: Drainage Controls**

Road diversions and culverts are partially filled with sediment.
