Hi Gregg,

As we discussed on the phone, our review of the Kinney #2 application is taking a bit longer than we had anticipated. In particular the hydrology review seems to be more complicated and will take longer so we will be extending our projected date for completion of the review to January 27th, 2011. We have asked our reviewers to make an effort to communicate with you during the next few weeks so that you will be able to work on a response to issues as they arise rather than hitting you with them all at once. We will plan to send you a comprehensive list of all the deficiencies, once the review is completed. Thank you for your understanding and please don't hesitate to call if you have questions.

Sincerely,

Daron R. Haddock
Coal Program Manager
