

Dr. Dianne R. Nielson

2

It should be noted that the TDN was issued September 21, due October 1, but not responded to (postmarked) until October 6--5 days late. In summary, DOGM's responses to violations 1, 2, and 3 are initially appropriate, while the response to violation 4 is inappropriate, pending a revision approval.

Please address any questions concerning this determination to Stephen Rathbun, Supervisory Reclamation Specialist, at (505) 766-1486.

Sincerely,

Robert H. Hagen, Director  
Albuquerque Field Office
