DIVISION OF  
OIL, GAS & MINING

Dear Mr. Braxton:

The enclosed Office of Surface Mining Reclamation and Enforcement (OSMRE) inspection report identifies violations that are considered to have existed at the time of the previous State complete inspection but had not been cited.

Date of Federal Inspection: 09-29-88 Date of LSCI: 08-09-88

The determination that the State did not cite the violations is based on one or more of the following reasons:

The condition was identified in a State inspection report but no State enforcement action was taken.

Design criteria or required certification has not been met for a structure in existence as of the last complete inspection (sediment pond, excess spoil fill, etc.).

Necessary controls that were required at the time of the last complete State inspection have not been established (diversion ditches, sediment ponds, top soil protection, signs and markers, etc.).

Site conditions indicate that the violations noted had been in existence at the time of, or prior to, the last complete State inspection.

Other (give explanation).

Although the violations were cited by the State during a joint inspection, OSMRE feels that the violations were evident during the last complete inspection.

Indicate below the Division's reason(s) for not citing the alleged violations.

Not a violation

Precluded by State policy

Not included under State program

Warning given in Lieu of a Citation

Violation not recognized (missed)

Practice allowed under approved permit

Too minor to cite

Working with operator to correct
