## Synopsis

Stipulations R614-301-742.113 (TM) and R614-301-140 (JK) have not been adequately addressed and approved. The issue of normally accepted husbandry practices for on site work during the extended liability period was being pursued by the operator as part of R614-301-742.113 (TM). Cut slopes should be included in the disturbed area map for approval of R614-301-140 (JK). Personnel change at Western States Minerals has probably prolonged the operator's timeliness in responding to these stipulations.

## Recommendation

All stipulations must be approved by July 15, 1991, or a violation will be issued.
