BEFORE THE DIVISION OF OIL GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
STATE OF UTAH

---ooOoo---

IN THE MATTER OF THE APPEAL	:	FINDINGS, CONCLUSIONS
OF FACT OF VIOLATION OF	:	AND ORDER
N91-35-6-1, N91-35-7-1, AND	:	
N91-32-6-1, WESTERN STATES	:	
MINERALS CORPORATION, J. B.	:	INFORMAL HEARING
KING MINE, EMERY COUNTY,	:	CAUSE NO. ACT/015/002
UTAH, ACT/015/002	:	

---ooOoo---

On February 11, 1992, the Division of Oil, Gas and Mining ("Division") held an informal hearing concerning the fact of violation for the above-referenced Notices of Violation ("NOV"). The following individuals attended:

Presiding:	Dianne R. Nielson, Director Division of Oil, Gas and Mining
Petitioner:	Denise Dragoo, Esq. Fabian and Clendenin Counsel for Western States Minerals Corporation
	E. M. (Buzz) Gerick Vice President of Operations Western States Minerals Corporation
	Dwight J. Crossland J. B. King Minesite Representative Western States Minerals Corporation
	Samuel Bamberg, Ph.D. Reclamation Specialist Consultant for Western States Minerals Corporation
Division:	Lowell Braxton Associate Director for Mining
	Pamela Grubaugh-Littig Permit Supervisor

Susan White
Reclamation Biologist
Issuing Inspector (N91-35-6-1
and N91-35-7-1)

Henry Sauer
Reclamation Soils Specialist
Issuing Inspector (N91-32-6-1)

Tom Munson
Reclamation Hydrologist

Bill Malencik
Reclamation Specialist

Paul Baker
Reclamation Biologist

Jess Kelley
Reclamation Engineer

Board:

Joe Helfrich
Assessment Officer
Penalty Assessment

The Findings, Conclusions, and Order in this matter are based on information provided during this informal hearing and information in the files of the Division.

FINDINGS OF FACT

1. Notice of this hearing was properly given.
2. An assessment conference to review proposed assessments was not scheduled in conjunction with this informal hearing, because the abatements were not completed.
3. When the J. B. King Mine permit was renewed on August 13, 1990, one of the stipulations to the permit was R614-301-742.113(TM), which required:

Within 60 days of permit approval, the applicant must submit a plan to provide long term solutions for phasing out silt fences and incorporating more permanent erosion control structures in their place. The plan must identify the structures that will be used and how they will be designed and implemented. This material must be submitted for insertion into the PAP.

4. The date for submission of the plan, per stipulation R614-301-742.113(TM), was extended numerous times, with the most recent extension to November 1, 1991. The plan was not submitted by the November 1, 1991, deadline. No plan had been submitted at the time of the complete inspection on November 7, 1991.

5. Following the inspection by Susan White on November 7, 1991, NOV N91-35-6-1 was written and mailed on November 18, 1991. N91-35-6-1 was written for failure to comply with the terms and conditions of the permit, and failure to completely address and satisfy the requirements of stipulation R645-301-742.113 (TM) in a timely manner, and in accordance with Utah Admin. R645(614)-300-143.

6. Reports of inspections of the J. B. King Mine, conducted on September 10, 1991, and October 3, 1991, and copied to the operator, indicate that erosion which required maintenance was occurring on the site. During the October 17, 1991, technical site visit by Division staff and the operator, the operator was informed that erosion on the site must be repaired by the time of the next inspection or it would constitute a violation.

7. During the complete inspection by Susan White on November 7, 1991, the operator was conducting repairs on site. However, the inspector determined that the work was insufficient to

repair the previously referenced erosion damage, and the erosion damage was not repaired by the time the inspector left the site at the conclusion of the inspection.

8. Following the complete inspection on November 7, 1991, NOV N91-35-7-1 was written and mailed on November 19, 1991. N91-35-7-1 was written for failure to minimize erosion to the extent possible and failure to minimize erosion off the refuse pile, in accordance with Utah Admin. R645(614)-301-742.113.

9. Based on an inspection by Henry Sauer on December 12, 1991, NOV N91-32-6-1 was issued and mailed on December 19, 1991. N91-32-6-1 was written for failure to comply with the terms and conditions of the approved permit and failure to implement and construct the main feeder ditch and the feeder ditch in accordance with the design criteria specified in the permit, in accordance with Utah Admin. R645(614)-300-143.

10. Correspondence and inspection reports in Division files document an extensive history of problems associated with the construction, maintenance and reconstruction of the feeder ditch and main feeder ditch, beginning with the construction of the diversions in 1985, through reconstruction in 1988-89, and up to the present. The documents reflect on-going problems, principally insufficient riprap, improper placement (key-in and armoring) of riprap, necessity to replace or increase riprap, and damage to ditches during high intensity storms, which have been continually addressed by the Division and the operator.

11. The inspection report of the December 7, 1991, inspection verified that the feeder ditch and the main feeder ditch were not in compliance with the approved plan at the time of that inspection. Drawings and notes from Henry Sauer's February 3, 1992, site visit, while not documenting the site condition during the December inspection, do verify that the feeder ditch and main feeder ditch were out of compliance during the February site visit. Henry Sauer has stated that the ditches looked the same in February as they did in December.

12. During the informal conference, Dwight Crossland stated that Western States Minerals Corporation recognized the problems with erosion and high maintenance on the site and was concerned that the reclamation plan for the ditches and the refuse pile needed to be revised. The Division and Western States Minerals Corporation agreed that Western States would submit a revised plan to the Division by March 16, 1992, to address these reclamation problems.

13. The abatement dates for the NOVs were extended to March 16, 1992, to accommodate the informal hearing process.

CONCLUSIONS OF LAW

1. NOVs N91-35-6-1, N91-35-7-1, and N91-32-6-1 specifically address three distinct violations: 1) failure of the operator to comply with permit stipulation R614-301-742.113(TM), which would require the submission of plans for phasing out silt fences and establishing permanent erosion control structures (N91-

35-6-1), 2) failure of the operator to minimize erosion on the surface of the refuse pile (N91-35-7-1), and 3) failure of the operator to ensure that the feeder ditch and the main feeder ditch were constructed, reconstructed, implemented, maintained or otherwise operated in accordance with the approved plan. While the abatement of the N91-35-6-1 may include actions which would also be appropriate for abatement of N91-35-7-1, the violations cited in the three NOV's do not duplicate each other and the abatements required in the three NOV's are not contradictory with each other.

2. The operator contends that the storm event which damaged the feeder ditch and the main feeder ditch exceeded the design criteria for the ditches. The Division has no information to substantiate that statement, and the operator has provided no substantiating data.

3. The Division is not precluded from issuing NOV N91-32-6-1 due to Utah Code Ann. § 40-8-9(2) under Utah Code Ann. § 40-10-4. Inspection reports and correspondence in the files of the Division indicated that the construction and maintenance of the feeder ditch and the main feeder ditch have received continuous and ongoing attention since their original construction as part of the reclamation plan.

4. Because the Division and operator have agreed to the submission of the March 16, 1992, plan regarding erosion on the refuse pile and the ditches, it would be contradictory to require the operator at this time to abate N91-32-6-1 by constructing the feeder ditch and the main feeder ditch in accordance with the

approved permit. N91-32-6-1 should be modified to provide an abatement consistent with the plan proposal and review agreed upon by the Division and the operator.

ORDER

NOW THEREFORE, it is ordered that:

1. NOVs N91-35-6-1 and N91-35-7-1 are upheld.
2. NOV N91-32-6-1 is upheld with modification of the required abatement. The remedial action required for abatement will be the submission of a complete and adequate plan for design and construction of the feeder ditch and the main feeder ditch to meet the requirements of Utah Code Ann. § 40-10-1 et seq. and Utah Admin. R645(614)-100-1 et seq.
3. The Petitioner may appeal to the Board of Oil, Gas and Mining the informal determination of fact of violation by filing said appeal within 30 days of the date of this Order, in accordance with statutory and regulatory requirements.

SO DETERMINED AND ORDERED this 10th day of March, 1992.

Dianne R. Nielson, Director
Division of Oil, Gas and Mining
State of Utah

CERTIFICATE OF MAILING

I hereby certify that I caused a true and correct copy of the foregoing FINDINGS, CONCLUSIONS AND ORDER for Cause No. ACT/015/002 to be mailed by certified mail, postage prepaid, the 10th day of March, 1992 to:

✓Denise Dragoo, Esq.
Fabian and Clendenin
215 South State Street
Salt Lake City, Utah 84111

✓E. M. Gerick
Vice President of Operations
Western States Minerals Corporation
4975 Van Gordon Street

Kim A. Kubota

BEFORE THE BOARD OF OIL, GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
STATE OF UTAH

---oo0oo---

IN THE MATTER OF THE APPEAL	:	FINDINGS, CONCLUSIONS
OF FACT OF VIOLATION	:	AND ORDER
#N93-25-2-1,	:	
J.B. KING MINE,	:	INFORMAL HEARING
EMERY COUNTY, UTAH	:	CAUSE NO. ACT/015/002

---oo0oo---

On Monday, June 21, 1993, the Division of Oil, Gas and Mining ("Division") held an informal hearing concerning the fact of violation for the above-referenced Notice of Violation ("NOV"). The following individuals attended.

Presiding:	James W. Carter Director Division of Oil, Gas and Mining
For the Petitioner:	E. M. Gerick Western States Minerals Sam Bamberg Consultant Ingrid Hannie Consultant
For the Division:	Pamela Grubaugh-Littig Permit Supervisor Tom Munson Reclamation Specialist Joe Helfrich Reclamation Specialist Susan White Reclamation Specialist Henry Sauer

Reclamation Specialist

The Findings, Conclusions, and Order in this matter are based on information provided by the Petitioner in connection with this informal hearing, and information in the files of the Division.

FINDINGS OF FACT

1. Notice of this informal hearing was properly given.
2. NOV #N93-25-2-1 consisted of one part. This part was written on the failure of the undisturbed diversion above the refuse pile behind the revegetation test plot to prevent to the extent possible additional contributions of suspended solids to streamflow outside the permit area.

CONCLUSIONS OF LAW

1. Because the diversion flows off the permit area and captures disturbed area flows and transports them off the permit area without any treatment, this diversion is not exempt from the requirements of Utah Admin. R.645-301-742.312.3 to prevent to the extent possible additional contributions of suspended solids to streamflow outside the permit area. No information was presented to the confirm that the drainage was treated prior to leaving the permit area.

ORDER

NOW THEREFORE, it is ordered that:

1. The fact of violation NOV #N93-25-2-1, Part 1 of 1 is upheld.

2. The finalized assessment for NOV #N93-25-2-1, Part 1 of 1 is due and payable within 30 days of the date of this Order.

3. The Petitioner may appeal to the Board of Oil, Gas and Mining the informal determination of fact of violation and finalized assessment by filing said appeal within 30 days of this informal Order, in accordance with statutory and regulatory requirements, including escrowing the assessed civil penalty.

SO DETERMINED AND ORDERED this 19th day of July, 1993.
