**A. Event Violations Max 45 PTS**

1. What is the event which the violated standard was designed to prevent?  
Conducting activities without appropriate approvals.
2. What is the probability of the occurrence of the event which a violated standard was designed to prevent? Occurred

**PROVIDE AN EXPLANATION OF POINTS**

The inspector's statement revealed that without proper implementation of specific hydrologic drainage control design criteria, reclamation is jeopardized. Precipitation events theoretically will be more numerous and events below the design events will not be properly conveyed through the channel and eventually to the sediment pond. The stability of the main feeder channel and the feeder channel is in jeopardy.

\*In assigning points, consider the duration and extent of said damage or impact, in terms of area and impact on the public or environment.
