MEMORANDUM

TO: Pamela Grumbaugh-Littig, Permit Supervisor  
FROM: *JB* John Blake, Mineral Resources Specialist  
SUBJECT: J.B. King Mine

I visited the J.B. King mined land reclamation site on May 19, 1993. I have no immediate concern with the site but I noticed that a number of rills are beginning to develop in the top soil which covers the spoil pile.

I hesitate to suggest use of heavy equipment on the site for fear of disrupting what little vegetation is present. Perhaps some additional mulching or rip-raping of the rill areas by hand or using light equipment is in order. I leave the problem for your expertise but ask that measures be taken by Western States Minerals to ensure that the spoils pile does not become exposed.

Thank you for your stewardship of this site.
