Re: Western States Minerals Corporation, J.B. King Mine, Emery County, Utah,
January 21, 1992 with UDOGM Staff and WSMC

Dear Lowell:

Enclosed please find the J.B. King Map entitled "Drill Hole Location and Mining Sequence Map", dated November 1977. This map shows the premining drainage contours before the area was disturbed and used as a borrow source for reclamation purposes.

WSMC is reviewing DOGM's internal memo dated November 10, 1992 regarding the acid and toxic forming properties of the refuse materials and plans to discuss some of the conclusions formulated by the Division upon further review. WSMC also requests copies of any other similar internal DOGM memos or data, related to the September 15, 1992 WSMC submittal that would be useful in addressing any of the outstanding issues in the December 7, 1992 DOGM letter.

WSMC would like to thank you and the DOGM staff for taking the time to meet with Western States Minerals Corporation on January 21, 1992. We look foreword to working closely with your staff on the J.B. King Mine Project.

Sincerely,

Western States Minerals Corporation

Lawrence D. Berg
