10/27

DIVISION OF OIL GAS & MINING FIELD VISIT FORM TECHNICAL

Date : October 9, 1996

Mine: J.B. King

File Number: ACT/015/002

Folder # 2

DOG M Staff: Robert Davidson, Susan White and Sharon Falvey

Other Attendees:

Purpose:

- Quarterly sugar treatment for cryptobiotic test plots and site inspection visit.

Observations:

- Late summer rains scoured the soil surfaces at Blocks #1 and #2 with Block #1 being hardest hit. Block #3 fared the best with little surface erosion because of surface rock.
- Could still smell sulfur on the soil surface for all sulfur treated plots. However, visible sulfur particles were gone from the soil surface for all sulfur treatments except for a few plots in Block #3.
- No visible signs of surface cryptobiotic crust development.

Recommendations/Conclusions:

- Continue sugar treatments and monitoring for cryptobiotic crust development.
