WILDLIFE SURVEY PLAN

Beaver Creek Coal Company
Huntington Canyon No. 4 Mine

Beaver Creek Coal Company will carry out a Wildlife Survey based on the accompanying "Guidelines for Fish and Wildlife and Habitat Information" prepared by the Utah Division of Oil, Gas, and Mining.

We have retained a consultant, Western Resource Development Corporation of Boulder, Colorado to perform the survey.

Based on the guidelines many of the surveys must be conducted in the spring and summer. These surveys will be performed during the spring and summer of 1981. The final report will be submitted to the Regulatory Authority by September 1, 1981.
