DIVISION OF
OIL, GAS & MINING

Dear Wayne:

As I discussed with you earlier this summer, Beaver Creek Coal Company has decided to repair and install surface water gauging stations on each mine site. We have just retained a consultant to perform the design work and installation of the stations. Areas where we will be installing new gauging stations are shown on the enclosed maps.

We are in the process of procuring landowner consent for installing the gauging stations on the Beaver Creek drainage and we have filed a Special Use Permit Application with the Forest Service for the Huntington Canyon No. 4 Mine sites.

New gauging stations will be installed in October and November as the weather permits. Any stations which are not installed this fall will be completed next spring.

If you should have any questions about the surface gauging station locations, please call me at 303-575-7506.

Sincerely,

David R. Chenoweth
Environmental Coordinator
