DIVISION OF
OIL, GAS & MINING

Dear Mr. Tetting:

In your letter of July 28, 1981 which gave approval to the drilling for the seismic survey we conducted in the Huntington Canyon area, Emery County (your reference CEP/015/007), you requested that we notify you when our operations were completed. To comply with your request, we submit the following:

1. Forty-six (46) holes were drilled at 200 foot intervals to a depth of 60 feet. (see attached map)
2. Five pound explosive charges were placed in each hole at depths of 60 and 45 feet then the holes were backfilled with cuttings.
3. Production data were gathered on August 15, 1981, and the charges were detonated one at a time.
4. After shooting, each hole was checked and additional fill was added where necessary.

I trust that this notice is sufficient to meet your July 28 request. If anything further is needed, do not hesitate to call me at (303) 575-7555.

Sincerely,

James F. Kohler
Senior Geologist
