Mr. John Rains
Chief Mining Engineer
California Portland Cement Division
695 South Rancho Avenue
Colton, California 92324-4260

John
Dear Mr. Rains:

Re: Certification Requirements for Sediment Ponds, Class I Haul Roads, Coal Waste Ponds and Impoundments, California Portland Cement Division, Hidden Valley Mine, INA/015/007, Folder #2, Emery County, Utah

Division certification of the above types of structures is being scrutinized by federal inspections, and the enclosed policy is designed to provide consistent certification reporting statewide. I have asked Bill Warmack, Reclamation Specialist/Inspector, to review your present certification reporting for these structures with you, and to discuss completion of the requisite reports, where necessary.

If remedial action is required to bring your certification reporting into compliance with the regulations, you should take the requisite steps prior to the next state inspection. Thank you for your cooperation.

Sincerely,

Lowell P. Braxton
Administrator
Mineral Resource Development
and Reclamation Program
