## INSPECTION REPORT

PERMIT NUMBER: ACT/015/007 DATE OF INSPECTION: 10/20/92

(Comments are Numbered to Correspond with Topics Listed Above)

1. The permit was renewed on January 30, 1992. The permitting issue of plugging water wells is currently being reviewed by the Division and a Division Order is being formulated to address the requirements of the operator to address this issue.

2. The entrance sign showing the permit number, address and phone number of the operator was current and in place. The location and placement of the disturbed boundary markers are under appeal. The location and placement of the stream buffer signs are under review.

4a. Diversions were inspected and some maintenance had been carried out regarding the water bars on the road, the upper end of the main diversion, and the side slope of the undisturbed diversion on the East end of the property. There appeared to be some evidence of recent runoff but it was difficult to tell how recent. The existing erosion problems on the outslope of the cattle trail are still evident. Some very minor attempts to improve the water bars was evident.

4c. Sediment control structures were in good repair and functioning as intended.

4d. The operator has submitted field water quality data at all established water monitoring points on October 13, 1992 and submitted this information to the division for the third quarter of 1992.

4e. There was no evidence of water leaving the site through any of the sediment control structures.

13. Successful revegetation has been considered a question of weed control and reseeding to achieve vegetative success. To date, no reseeding or weed control has taken place. Vegetative success still remains questionable in certain areas and the operator should certainly consider proactive measures such as reseeding to assure success.

21. Insurances and bonds are current, in place and adequate.

Pending Enforcement Actions - A decision regarding N.O.V. No. N91-26-8-2 is pending a decision from Third District Court. (at the time of the inspection).

Note - This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining
