- 731.610. No land within 100 feet of a perennial stream or an intermittent stream will be disturbed by coal mining and reclamation operations, unless the Division specifically authorizes coal mining and reclamation operations closer to, or through, such a stream. The Division may authorize such activities only upon finding that:
- 731.611. Coal mining and reclamation operations will not cause or contribute to the violation of applicable Utah or federal water quality standards and will not adversely affect the water quantity and quality or other environmental resources of the stream; and
- 731.612. If there will be a temporary or permanent stream channel diversion, it will comply with R645-301-742.300.

731.620. The area not to be disturbed will be designated as a buffer zone, and the operator will mark it as specified in R645-301-521.260.

Finding

A Stream Buffer Zone variance was approved by the Division May 2, 1980 with two stipulations. The plan must include this stream buffer zone variance and document what has been done to meet the stipulations of that approval. The appropriate map must indicate the location of the Stream Buffer Zone Variance Area. Upon approval of this information in the PAP, Stream Buffer Zone signs must be properly located.

It is hereby ordered that Hidden Valley Coal Company make the requisite permit changes in accordance with R645-303-220 and submit a complete application for permit change, addressing the findings of permit deficiency by no later than June 12, 1992.
