Jim: I'm not sure what the thrust of any discussions you've had with Lee are. I'm concerned that the position we've long held to could be eroded if our written record isn't consistent in requiring seeding of the out slopes of the road prior to release of reclamation liability.

I think we need to stand firm on the requirement to seed the road out slopes if that is what the plan requires, and if that is what our Bio.'s feel is required.

Would you like me to draft something summarizing this position?
Pl advise. Lowell
