RE: 5-year Permit Renewal, Consolidation Coal Company, Hidden Valley Mine, ACT\015\007-96I, Folder #2, Emery County, Utah

**SUMMARY:**

On September 19, 1996, the permittee submitted an application for 5-year permit renewal. Since the permittee has recently taken over ownership of this site, the permit renewal involved a change in the title blocks of all the maps.

The only deficiency that the Division found in the permit renewal application was that the maps were not properly certified by a professional engineer or land surveyor. The Division informed the permittee of this in a November 6, 1996, letter.

On November 25, 1996, the permittee resubmitted the maps with the necessary professional certification.

**TECHNICAL ANALYSIS:**

The permittee resubmitted 5 recertified maps:

1. Plate I(b)--Permit Area and Boundary Water Sampling Points
2. Plate II--Proposed Facilities
3. Plate III--Final Reclamation
4. Plate V--Final Configuration
5. Plate VI--Case II Road Vertical Alignment

December 3, 1996  
ACT/015/007

As required by R645-301-512, all of the resubmitted maps have been certified by Thomas Earl Boutaugh, a professional engineer registered in the state of Illinois.

**RECOMMENDATION:**

It is recommended that the resubmitted maps be approved and included as part of the approved plan.
