1. Permits, Change, Transfer, Renewal, Sale

Amendment 97B to the MRP was approved September 22, 1997. Reclamation activity on the B seam side of the site commenced in 1997. The MRP indicates that the A seam side will be reclaimed in a similar manner in a couple of years after evaluation of the B-seam side. The Permittee was aware of this commitment, but indicated that Consol's Board of Directors will be meeting on December 8 to determine whether to pursue portal development in the A seam at the Hidden Valley mine to access federal leases to the north. The reclamation of the A seam side will depend upon Consol's decision at that meeting.

4.c Hydrologic Balance: Other Sediment Control Measures

The site was dry. All sediment control is in place and appeared to be functioning.

4.d Hydrologic Balance: Water Monitoring

Ivie Creek was flowing and the water was clear.
