Dear Dr. Seddon,

On behalf of the Utah Department of Natural Resources, Division of Oil, Gas, and Mining (DOGM), and at the request of Mr. Joe Helfrich, DOGM, Montgomery Archaeological Consultants, Inc. (MOAC) is requesting consultation on Utah Project No. U-06-MQ-0289p. The report, site forms, and original photographs were sent to your office on 15 March 2006. As stated in the cover letter accompanying the report materials, the cultural resource inventory resulted in the documentation of 14 new sites (42Em3590 through 42Em3603), the re-recording of two sites (42Em1227 and 42Em1228), and the identification of two isolated finds of artifacts (Isolated Finds A and B). Thirteen sites (42Em1227, 42Em1228, 42Em3590, 42Em3591, 42Em3592, 42Em3593, 42Em3596, 42Em3597, 42Em3598, 42Em3599, 42Em3600, 42Em3602, and 42Em3603) are recommended eligible to the NRHP. All the sites determined eligible to the NRHP should be avoided by any ground disturbance activities. During the fieldwork MOAC placed blue ribbon around the boundaries of all sites to aid Consol Energy in the planning and avoidance process. Based on these avoidance procedures, a recommendation "no historic properties affected" is proposed for this undertaking pursuant to Section 106, CFR 800.

If you require additional materials or require more information, please contact MOAC or Mr. Helfrich at DOGM. We appreciate your attention to this request and look forward to working with you on this project.

Sincerely,

Jody J. Patterson
