Attention: Mike Thompson

RE: Water Control Structure for
Trail Mountain Coal Company
Existing sediment pond

Dear Mike:

As per our telephone conversation, I have enclosed five copies of the proposed design for the emergency and principle spillways for the existing sediment pond at Trail Mountain Coal Mine. The structure is designed to handle the twenty-five year storm as directed by your office.

Please review this, and let me know if it meets with your approval. If approval is given, we will move into construction of the structure as soon as possible.

Thank you for your help in this matter.

Sincerely,

Howard R. Tuttle
