Memo to Coal File:

RE: Trail Mtn. Mine
Trail Mtn. Coal Company
ACT/015/009

While at the UP&L Cottonwood Portal site on September 17, 1980, it was decided that Clark Johnson, USFWS and Larry Dalton, DWR, should become acquainted with this operation in anticipation of a wildlife consultation and mine plan review. Mary Ann Wright of the Division accompanied them.

Search for a golden eagle nest purported^{to be} above the portal was futile, although it appeared that an owl nest exists in the small box canyon above the portal.

MARY ANN WRIGHT *MAW*
