RE: Design Plans, Sediment  
Control Facilities  
Natomas Trail Mtn. Coal Company  
Trail Mountain Mine  
ACT/015/009  
Emery County, Utah

Dear Mr. Christiansen:

Please find enclosed one (1) copy of Natomas Trail Mountain Coal Company's design plans for upgrading of their current sediment control facilities at the Trail Mountain Mine. Plans consist of culverting approximately 800 feet of Cottonwood Creek through the mine permit area on fee surface.

Also included are plans for relocation and reconstruction of the sedimentation pond. Design calculations are included in latest submission of the Mining and Reclamation Plan under section seven, Hydrology. The Office of Surface Mining should have a copy of this plan for you, if it has not been forwarded as of yet.

If you have any direct comments or concerns applicable to this proposed project, please forward them to the Office of Surface Mining and our office at your earliest convenience. The company is seeking to begin construction this fall to accomplish this modification and to establish compliance with the permanent performance standards as outlined under Utah's approved coal regulatory program.

If you have any questions, please feel free to call myself or Sally Kefer of the Division.

Sincerely,

*Sally Kefer*
