abatement

response to NOV N 82-7-7-1

Attention: Ken Wyatt

Dear Ken:

At this time, I would like to submit to you and the Division this proposed plan for controlling and channeling disturbed area runoff through our loadout area into our sediment pond.

Proposal: Install 40' of 12" culvert at the upper and lower crossings.
Dig a drainage ditch the length of the area in question to the sediment pond.
Construct a berm along the ditch to ensure that the ditch will remain clean from debris and traffic.

I am sending a surface map of the mineside to show you the area in question.

Should you need further information or have any questions, please call.

Sincerely,

NATOMAS TRAIL MOUNTAIN COAL COMPANY
