Inspection Memo
to Coal File:

RE: Natomas Coal Company
Trail Mountain Mine
ACT/015/009
Emery County, Utah

Jodie Merriman and Frank Atencio of OSM and Ken Wyatt and Sandy Pruitt of the Division stopped in at the Trail Mountain Mine to determine progress toward abatement of NOV #1 (N82-2-4-1) on May 11, 1982. It was immediately evident that the surface grades had been improved. Drainage was retained within the disturbed area and the berm along Cottonwood Creek at the parking lot had been enhanced. No measures had been taken toward stabilization of the section of Cottonwood Creek embankment above the upper access nor have any plans been submitted as of this writing. The NOV was extended until June 6, 1982.
