RE: Approval Stream
Channel Culvert Extension
Trail Mountain Mine
ACT/015/009
Folder No.'s 4 & 7
Emery County, Utah

Dear Allen:

The Division has received and reviewed the stream cross-sections prepared by Viking Engineering Service and we have found the cross-sections more than adequate.

The submittal of the stream cross-sections was the only item needed by the Division prior to approving the installation of the main channel culvert extension. Therefore, please consider this letter as official approval to proceed with the culvert extension. We are in the process of reviewing the design criteria for the sediment control structures which were submitted in the surface maintenance plan on April 11, 1983 and should have a response to their adequacy in the very near future.

Sincerely,

JAMES W. SMITH, JR.
