RE: Modification to the Trail Mountain MRP - Culvert Inlet - Page 7-61

Dear John;

As per our conversation on 8-28-85, I would like to formally submit to you and the Division, a proposed modification of the Trail Mountain Coal Company approved Mining and Reclamation Plan.

The modification consists of the following:

- * 1. The elimination of the concrete wing walls as shown in attachment A.
2. The replacing of the box-type trash rack shown in attachment A with the more effective design of a self-cleaning trash rack shown in figure 7-13A, detail A (replacement material).
3. The addition of attachment B stating the hydraulic characteristics of the existing feature, with rip-rapped channel walls in place of wing walls.

Your consideration and prompt review of this modification would be greatly appreciated.

Sincerely;

TRAIL MOUNTAIN COAL COMPANY

Allen P. Childs
Engineer

APC/gg

* Conditions in the field may dictate the installation of concrete headwalls.
