RE: UPDES Permit UTG04003 (001)  
(Formally NPDES UT-0023728)  
Beaver Creek Coal Company  
Trail Mountain No.9 Mine

Dear Mr. McNiell:

Pursuant to our phone conversation earlier today, Beaver Creek Coal Company is herein providing written notification of an incident of noncompliance on Permit UTG 04003 (formally NPDES UT-0023728), location 001. The non-compliance resulted from a recent inspection, during which a discrepancy was noted between the oil and grease quantity on the report and the lab sheet. Upon closer examination, it was discovered that the lab result was 14.2 mg/l for oil and grease, and 8.0 had been typed in the NPDES report. Apparently, the 8.0 quantity for T.S.S. had been transposed to the oil and grease section on the report. A revised report is enclosed with this letter.

The 14.2 mg/l value for oil and grease represents noncompliance for that parameter. The pond was being discharged in preparation for sediment cleaning. During the cleaning process, it was discovered that the oil skimming device on the primary overflow had become dislodged and was not operable. This is apparently what caused the exceedence in the oil and grease parameter. The skimmer has been replaced, and the pond was cleaned; therefore, the problem has been corrected, and no further exceedences are expected.

If you have any questions, or need any further information, please let me know.

Respectfully,

A handwritten signature in cursive script, appearing to read "Dan W. Guy".

Dan W. Guy  
Mgr. Permitting/Compliance
