RE: BTCA's, Trail Mountain #9, Mountain Coal Company, ACT\015\009, Folder #2, Emery County, Utah

SUMMARY

After reviewing the latest submission from Mountain Coal regarding BTCA's at Trail Mountain, a number of issues are still unresolved. These issues remain despite your letter of 9 September 1992, which requested certain revisions.

No explanation has been given as to why the runoff from the areas can not be routed to a sediment pond, which is generally the best technology currently available. In addition, the submission does not contain any information regarding runoff volumes from BTCA's. Last, the maps submitted are still not legible. Legible maps are necessary for review especially since new information will have to be added to certain maps and those maps require review. Until these problems are corrected, no further review can be conducted on this amendment.
