Re: 1993 Trail Mountain Exploration Drilling  
 PacifiCorp, Trail Mountain Mine

Dear Pam:

The above referenced proposal has been reviewed. The comments listed below address the concerns of this office.

1. From the information enclosed with the proposal, it does not appear that any stream crossings will be required. However, should the need arise, proper application must be made with this office prior to initiating any work.
2. Attachment 6 of the proposal identifies the amount of water required for drilling, and the source from which it will be obtained. Prior to utilizing this source, proper application must be made with this office to cover the amount of water and uses indicated. In addition, it appears that ownership of the referenced pond is by the Forest Service. Therefore, verification of authorization of use from the Forest Service should be supplied to this office.

Should you have any questions regarding the foregoing comments, please feel free to contact me.

Sincerely,

*William A. Warmack*

William A. Warmack  
 Assistant Regional Engineer
