The facility has had a Stormwater Pollution Prevention Plan in place since 1998, including the certification by Mr. John Christensen, P.E., and it has been recently updated in November 2005. Mr. Oakley indicated that the plan was last updated to reflect the mine's inactive status and that no other changes have occurred at the facility. Mr. Oakley was very accommodating throughout the inspection, which included a file review followed by a tour of the facility area. There were no deficiencies observed during the inspection, but one recommendation was to make a notation in the SWPPP that the site evaluations are recorded in a separate inspection log book.
