Subject: RE: Energy West Mining 3rd Quarter 2006 Water Data

Jim,

As you know, the electronic transfer system has it's input problems. I'm sure that the potassium for WCWR1 was submitted with the other parameters for that site. I checked the lab analysis report and the potassium result was 30.66 mg/l. Because of the difficulty in finding the file with that data, could you input that result?

The CCC1 field information was also submitted for July, August and September. I'll get the field book and input this information again in the system. It isn't a big deal to do field and flows. I'll notify you when it is ready for you to upload.

Dennis told me that the Division sends a report to us of what was uploaded to your system. I haven't received the report yet. Would you please check on that for me.

Thanks,

Guy

Guy,

I just got around to looking at the 3rd Qtr submittal for Trail Mtn. Mine.

Field parameters for CCC1 are not in the database.
The potassium value is missing for WCWR1.

Pam,

The 3rd Quarter 2006 Water Data has been checked and is ready to upload to the Division's system. Please notify me when the upload takes place and send a report so I can verify that all data was successfully uploaded.

The water data entry and reporting responsibility has been moved from Dennis Oakley to me.
If you have any questions, please give me a call.

Thanks,

Guy Davis
