RE: 2008 Second Quarter Water Monitoring, PacifiCorp, Trail Mountain Mine, C/015/0009, Recurring Task ID #2713

The Trail Mountain Mine is currently idle. The monitoring plan is described in Appendix A of Volume 9 of the MRP.

1. Were data submitted for all of the MRP required sites?

In-mine YES NO

The mine is sealed, so other than the Oliphant portal discharge (18-1-1 or T-18), which is monitored as a spring, there is no monitoring of underground or in-mine water.

Springs YES NO

Streams YES NO

UPDES YES NO

DMRs were submitted in electronic format (Adobe). There was no discharge from either UPDES point during the second quarter 2007. The mine was sealed in June 2001 and there has been no reported discharge at UPDES UT23728-002 (the mine-water discharge into Cottonwood Creek) since May 2001.

Wells YES NO

Since July 2004, the water level in TM-3 has been reported as head above the casing elevation, determined from pressure measured by a gauge on the sealed wellhead.
