Keenan,

I've found that the Deer Creek MN-ME site (in-mine location) has an error on the Data Base. March 2014 flow is reported at 0.9 gpm. It should have been reported at 0.09 gpm. Could you edit the Data Base for me please.

Thanks

*Dennis Oakley*

Keenan,

I'll have to get the TM info turned in tomorrow. Other things came up that demanded priority.

I would still update the Trail Mountain water monitoring program table in the Trail Mountain task submittal because I look at the Trail Mountain submission as a stand alone document. As I review the Trial Mountain submission it currently doesn't have a water monitoring plan for the waste rock site.

Ok....

I was also thinking that amending Volume 1 (CTW) and Volume 9 (CTW/DC) to remove the sediment pond discharge and waste rock well from CTW monitoring should be added to the CTW submittal and not the Trail submittal.

Hi Dennis,

In the Trail Mountain waste rock submission the Hydrology Appendix A and Appendix B pages are missing. Can you submit these as well so they can be added to the task? You won't need to change the C1/C2 forms because these pages are accounted for in the addition of Volume 4.

Thanks,
