Bryant,

I spoke with Daron and we're good with extending the Fossil Rock mid-term response (#5488) 30 days in order to resolve the issue of overlapping revisions to the permit with the boundary adjustment amendment (#5494). The new due date for the Fossil Rock mid-term adjustment will be October 29th.

Regards,
Steve

Steve,

Due to us being close to approval with the deficiencies associated with the boundary change at Fossil Rock Mine, I'm requesting a 30 day extension on the due date for the midterm review deficiencies response (Task #5488). It makes sense to gain approval on the boundary change amendment before submitting a response to the midterm review. This will simplify the process of emending the permit due to the potential of similar content being revised in both amendments. Let me know if you have any questions. Thanks for your help.
