RE: Emery Deep Mine
Emery County, Utah
ACT /015/015

Dear Mr. Helfrich:

As I indicated during our telephone conversation of September 24, 1980, Consolidation Coal Company intends to erect a pre-fabricated bulk rockdust bin at its Emery mine site. Construction will take place in a previously disturbed area that is presently permitted (reference attached map of the mine's surface facilities).

Construction work involves excavation of an area of sufficient size for placement of a fourteen (14) sq. ft. concrete pad, followed by backfilling and mounting of the rockdust bin.

It is my understanding that this notification is the only action necessary for Division approval of this project.

Sincerely,

Ron Thompson
Mine Engineer
