DIVISION OF
OIL, GAS & MINING

Attn: Ron Daniels

Dear Mr. Daniels:

Consolidation Coal Company wishes to notify the Division of Oil, Gas, and Mining of a proposed structure to house PCB transformers at its Emery Mine. Accordingly, the EPA requires a housing which meets SPCC plans and the additional requirements of 40 CFR, Part 761.42, Annex III. This part basically gives the minimum requirements for storage and design of the housing.

Consol proposes to place a premanufactured building which is approximately 20'x20'x16' on a seamless concrete floor. The building will be exclusively used for storage of PCB's until disposal of the equipment.

At the present time, our plans are to locate the building due south of the main substation now serving the mine. The structure will be directly off the road and will be more or less isolated from normal activity.

We do not anticipate any problems with the site. The structure needs to be in place by July 1, 1980 in order to meet the EPA reporting period for the year 1979. Any comments on this proposal would be appreciated as soon as possible.

Sincerely,

Britt Luther
