OCT 12 1983

Dear Mr. Smith:

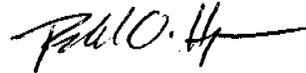

This letter is to confirm our phone conversation of October 4, 1983 concerning the stockpiling of underground coal development waste at the Emery Mine.

It is my understanding that coal development waste generated by the mine may be stockpiled in the "temporary coal stockpile area" located just outside the mine gate. The waste material may be stored here until provisions have been made for permanent disposal.

Please note that the proposed stockpile will be contained within approved drainage control structures.

If you have any further questions please contact me.

Sincerely,

Ronald O. Hughes
Mine Engineer
