RE: Modification to Lewis Property Restoration Plan
Emery Deep Mine - ACT/015/015

Dear Mr. Hedberg:

Mr. John Lewis has contacted Consol requesting the following modification to the restoration plan for his property.

1. Because of potential shortage of irrigation water this fall, Mr. Lewis has requested that both alfalfa and oats be seeded this spring. This is in lieu of a spring planting of oats and fall planting of alfalfa.
2. The following fertilizer changes will be adopted so as to accommodate the planting of alfalfa in the spring:
 - Reduce Nitrogen from 100#/acre to 50#/acre.
 - Increase P₂O₅ from 125#/acre to 250#/acre.
 - Decrease K₂O from 250#/acre to 125#/acre.

Again, all of these modifications are based upon the request of the land owner and follow typical cropping procedures utilized in Utah.

Should you require any additional information, please feel free to contact this office.

Sincerely,

Nicolaus P. Neumann, P.E.
Group Leader - Permits
