Re: Modification to Lewis Property Restoration Plan, May 1, 1987 Submittal, Consolidation Coal Company, Emery Deep Mine, ACT/015/015, Folder No. 2, Emery County, Utah

The May 1, 1987 submittal has been reviewed. All changes outlined within the modification request are complete and technically adequate. The planting schedule will be changed to a spring planting of both oats and alfalfa due to a shortage of irrigation water this season. In lieu of the schedule change the fertilizer requirements were altered to meet the growth requirements of the fall planting.
