Re: 4 East Portal Site
Emery Mine, Amendment to Permit ACT 015/015

Dear Mr. Braxton:

Consolidation Coal Company proposes to construct a new set of portals at the Emery Mine. The site is located near the center of Section 27, T22S, R6E, on the east boundary of the permit. The portal will be required for efficient access to the 4 East Mining Sections, further development of the north end of the mine, and additional intake air for the mine.

The attached amendment submittal is organized by revising the appropriate parts of Chapters 3.0, 5.0 and 13.0 of the permit. The change to Chapter 5.0 is the inclusion, as Appendix 5-2, of an archeological survey of the proposed site. A change, unrelated to this proposed amendment, has been made to Part 3.2.3.35 on page 3-13. The gaging stations referred to have been removed and this change brings the narrative up to date. Individual page and plate revisions (marked 5/89) are as follows:

Revised pages: 3-1, 3-13, 3-23, 3-23b, 3-24.
Revised pages, including page numbering: 3-56, 3-56a, 3-58.
Inserted pages: 3-1a, 3-4a, 13-96 through 118, Appendix 5-2
(including pages 1 through 15).
Revised plates: 3-1, 3-3.
Inserted plates: 13-29, 13-30.
Inserted figures: 13-1, 13-2, 13-3, 13-4.

Revised parts of the tables of contents are also included.

If there are questions concerning this submittal, please contact this office.

Sincerely,

William J. Dunn
Senior Engineer
