RE: EMERY MINE PERMIT ACT/015/015
AMENDMENT TO UPDATE THE STRUCTURES
AND FACILITIES SECTION OF CHAPTER II

DIVISION OF
OIL GAS & MINING

Dear Mr. Haddock:

Due to the impending removal of all underground storage tanks at the Emery Mine, we are updating the structures and facilities list in the operation plan for the above referenced permit. In addition to a new above-ground tank containment structure, several existing facilities have been added to the list:

- tipple transformer building
- steam cleaner building
- "Wen-on" antifreeze tank
- material storage area
- underground mine power switchhouse
- relocation of two (2) storage trailers

Plate II-1 has been revised accordingly. We have also revised the appropriate reclamation cost data in Chapters III and IV.

Because of these changes, we are also submitting a current Engineering Certification for Chapter I.

Enclosed are three (3) sets of the amended pages for your review.

If you have any questions concerning this amendment, please contact William Dunn at this office.

Sincerely,

Kevin L. Cheeks
Supervisor
Environmental Quality Control
