RE: Discharge points 005 & 006
UPDES No. UT0022616

Dear Mr. Gefferth:

We have reviewed your letter, revised maps and information of February 19, 1993 regarding the proposed discharge locations 005 and 006 from two surface water ponds. We understand these are existing ponds where the water formerly flowed to other ponds prior to discharge at approved locations.

The new discharge locations are to the same receiving stream and are not expected to significantly change the potential discharge quantity or quality. They are considered minor modifications of the existing permit.

Therefore, as allowed in the existing permit, the maps and discharge locations are approved.

Please call Steven McNeal of this office at (801) 538-6146 if you have any questions regarding this letter.

Sincerely,

Utah Water Quality Board

Don A. Ostler, P.E.
Executive Secretary
